MEGA LAB

over 30 years
in the development
of biologicals

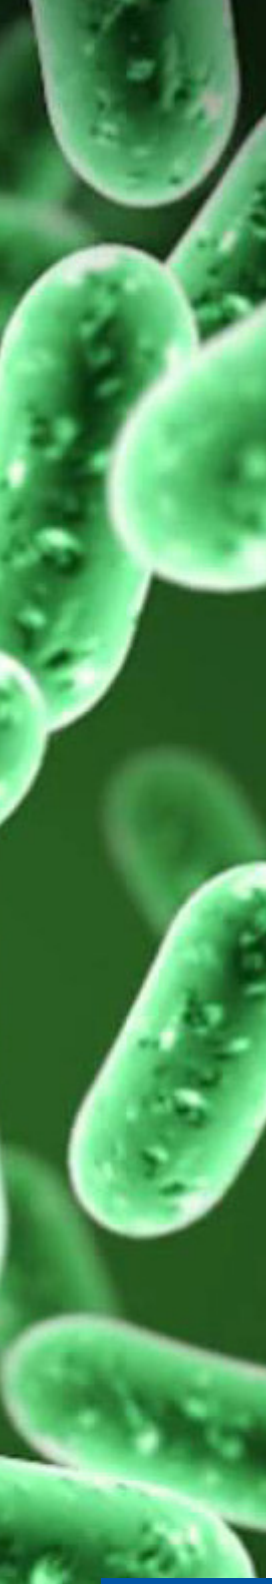
Providing the right Microbes for the right process

Powerful treatments for grease traps, accelerating the biodegredation of proteins, fats, oils, grease, carbohydrates as well as other organics encountered while at the same time providing absolute control of odours.

Before Treatment

After Treatment Established

Our products for Traps, Grease Pits, Lift Stations and Drain Maintenance are unique, comprehensive and formulated to provide positive results even under the toughest of conditions.



MEGA-LAB GREASE TRAP TREATMENT SYSTEMS

Mega-Lab drain and grease trap treatment products are uniquely designed to be complementary to all types of grease traps/interceptors. They act to digest and/or augment the digestion of grease and organics within drain and grease trap systems. Just as people take probiotics to assure and augment optimal digestive system bacteria levels in order to maximize digestion efficiency and immune system health, Mega-Lab microbial products are added to improve waste system health. Furthermore, they work to reduce soluble sulfides thus protecting and extending the life of drain and trap infrastructure, optimize existing natural drain and trap bacterial activity while at the same time reduce or eliminate undesirable odour conditions.

Mega-Lab products are manufactured to the highest standards using only quality ingredients. Those products containing bacteria use only select beneficial, natural non-engineered strains that have been on earth for millions of years and have been selected for their synergistic ability to biodegrade grease and organics. Mega-Lab bacteria do not contain genetically modified, engineered or deliberately mutated organisms and are analyzed, performance tested, quality checked and certified as non-pathogenic. These products do not contain enzymes or chemicals such as emulsifiers or detergents and thus do not circumvent the proper operation of traps/interceptors. They do not cause pass-through of grease, rather they contain the grease within the trap/interceptor, break it down, digest it and convert it into harmless by-products such as carbon dioxide and water.

BACTii-GT

BACTERIAL BLEND for GREASE TRAPS with ODOUR CONTROL

Superior blend of selected naturally occurring bacteria designed to function in the harsh grease trap environment and produce exceptional performance over the widest range of organic wastes. Provides immediate odour counteraction followed by the penetration, attack , break down and digestion of the organic sources of those odours (protein, starch, carbohydrate, fat, oil and grease build-ups).

BIO-DRIP

CONCENTRATED BIOLOGICAL DRAIN OPENER and MAINTAINER

Uniquely formulated natural, biological treatment designed to provide rapid penetration, breakdown and degradation of organic deposits and blockages found throughout drain and grease trap systems while counteracting odours.

BIO-GEN Foam for Drains

ONE STEP, EASY TO USE FOAMING DRAIN MAINTAINER

A totally new and unique concept in drain maintenance

Aerosol bio-energized foaming drain cleaner combining the power of concentrated natural bacterial blend in formula with citrus grease cutters and odour counteracting "boosters". Provides positive control of odour and elimination of drain fly and insect sources while maintaining drains in a clean and free flowing condition without the use of harsh chemicals or hazardous solvents.

DIGESTER

BIOLOGICAL BREAKTHROUGH for GREASE DIGESTION

Newest proprietary blend of bacteria selected to provide a naturally bio-energized liquid treatment specifically designed for superior grease degradation. Contains exclusive enhanced odour counteractants that act to effectively block malodours by inhibiting production of odour causing gasses from existing bacterial populations.

LIQUID 8™

BIO-ENERGIZED WASTE DIGESTER and ODOUR CONTROL

Naturally bio-energized liquid waste treatment for the widest range of applications. Incorporates multi-strain synergy of concentrated bacterial activity in a formula with highly effective odour counteractants. Acts to safely and efficiently break down and digest organics while providing positive control of malodours. Maintains systems in clean, free flowing condition with no harm to plumbing fixtures, drain lines, grease traps, sewers, field tiles or tanks.

BIO-STIMULANT/DETOXIFIER

microSTIM™ 725

CONCENTRATED BIO-AUGMENTER FOR GREASE TRAPS

Contains no enzymes, surfactants, emulsifiers, detergents or any other ingredient which might promote grease migration through the system

100% natural, concentrated, proprietary formula developed to incorporate a unique blend of over 30 natural trace minerals and bio-activators (bacterial stimulators) in conjunction with highly effective toxin renovators. This is the latest breakthrough in natural bio-augmentation for the treatment of grease traps, septic systems, sump wells and cesspools. Initially acts to tie up harmful system toxins, reducing the bio-availability of these contaminants thereby conditioning the grease trap environment to free up naturally occurring microbial activity to function at optimal rates maximizing both the rate and efficiency of organics break-down and odour reduction. Minerals and stimulators subsequently go to work to boost existing detoxified bacterial health providing reinvigorated, robust growth and performance. Synergistic design of the formulation effects reduced system organics and eliminates odourous conditions, producing and maintaining an active, clean, odour free and free flowing system without harm to plumbing fixtures, grease traps, drain lines, sewers, field tiles, tanks, wastewater treatment facilities or associated equipment.

*QUICK GREASE TRAP PRODUCT REFERENCE GUIDE**

PRODUCT	BACTERIA	SCENT	COLOUR	SPECIAL NOTES
BACTii-GT	Yes	Herbal	Opaque Beige	Bacterial Blend For Grease Traps with Odour Control
BIO-DRIP	Yes	Pleasant	Opaque Blue	Concentrated Biological Drain Opener and Maintainer
BIO-GEN	Yes	Citrus	Amber Liquid/White Foam	Aerosol Foaming Drain Opener and Maintainer
DIGESTER	Yes	Herbal	Opaque Blue	Biological Breakthrough For Grease Digestion
LIQUID 8™	Yes	Fresh Herbal	Opaque Yellow	Bio-Energized Waste Digester and Odour Control
microSTIM™ 725	No	Aromatic	Brown/Black	Micro Nutrients, Stimulants and Detoxifier

**Your sales representative can offer the correct product treatment system recommendation following a survey and thorough analysis of your application.*
