Our environment is of ever increasing importance. Less than efficiently treated effluent discharge and solids disposal are issues which can significantly impact our environment, each having potential to elevate pollution levels. For over 30 years we at Mega-Lab have been leaders in the wastewater treatment and water remediation industry supplying a wide range of naturally based product solutions second to none in both quality and reliability. We have the resources to resolve problematic conditions requiring sludge reduction, H_2S control, bio-augmentation, bio-stimulation, algae reduction and aeration through to odour control.

We pride ourselves in our ability to provide efficient and effective solutions for our customers through innovative cutting edge products coupled with unparalleled customer service.

ODOUR CONTROL

ODOUR CONTROL
